Tube slides for high play systems

Our tube slides come in a wide range of colours, sizes and shapes. Various details and extra accessories are also available. This model, for example, features a window at the top of the tube slide to let in additional light as the children are positioning themselves. A window – or several – is especially a good idea for tube slides with spirals because, unlike straight tubes, there is little influx of light from the bottom.

In addition to improving children's physical abilities in terms of balance, motor skills and spatial intelligence, a tube slide can also help strengthen their self-confidence. Although sliding is a fun activity, it still takes a certain amount of courage for children to climb up high and whizz down. Therefore, for many children, daring to try the tube slide gives them more faith in their own abilities. They overcome their insecurities and are rewarded with thrills and excitement on their way down the tube.

We are able to supply fully customised tube slides, and you are always welcome to contact our dealers if you want a product altered in any way, or if you are interested in a specially designed tube slide.

Specifications

Article number

TB6705

Recommended ages

From 3 years

Product dimensions (LxWxH)

386 x 187 x 388 cm

Max. fall height

305 cm
