-  **Low-maintenance**
-  **Sustainable materials**
-  **Fully certified**

### Tube slides in colourful combinations

Our tube slides come in a wide range of colours, sizes and shapes. This model combines several of our available colours for a very playful look. All the tube components are laser-cut, which guarantees a precise finish and exact dimensions – despite the fact that the material reacts differently depending on the colour. Therefore, you can always count on the holes matching and on being able to combine the colours just as you wish.

Every time the children go down the slide, they strengthen their balance and motor skills while also developing an understanding of cause and effect. When they sit at the top and push themselves forward, they are propelled down the tube – and this creates a subconscious connection between action and consequence, which helps to support their logical sense.

Spiral tube slides are always good for small areas where you want maximum fun with limited space. Our spiral tube slides are particularly space-saving, as our tubes are not built up around a single post but supported from below. Consequently, the tube spirals around itself, which reduces the circumference.

We are able to supply fully customised tube slides, and you are always welcome to contact our dealers if you want a product altered in any way, or if you are interested in a specially designed tube slide.

### Specifications

**Article number**

TB6703

**Recommended ages**

From 3 years

**Product dimensions (LxWxH)**

219 x 187 x 258 cm

**Max. fall height**

175 cm
