Tube slides at different heights

Our tube slides come in a wide range of colours, sizes and shapes. The straight tube slide is sure to put a smile on the faces of children young and old. Available at different heights, it can be adapted to any play system and age group.

Every time the children go down the slide, they strengthen their balance and motor skills while also developing an understanding of cause and effect. When they sit at the top and push themselves forward, they are propelled down the tube – and this creates a subconscious connection between action and consequence, which helps to support their logical sense.

The two models TB6726 and TB6727 are also equipped with our tube slide exit, as the straight shape and height result in high-speed slides. The tube slide exit ensures that children end their slide comfortably on emerging from the tube.

We are able to supply fully customised tube slides, and you are always welcome to contact our dealers if you want a product altered in any way, or if you are interested in a specially designed tube slide.

Specifications

Article number

TB6721

Recommended ages

From 3 years

Product dimensions (LxWxH)

264 x 97 x 228 cm

Max. fall height

145 cm
