Product description

The Zipline/Cableway offers children the thrill of gliding through the air on an exciting and safe ride. With a height difference of 2,5 meter from start to finish, it provides speed and height to create that exhilarating "tickle-in-the-belly" feeling that children love.

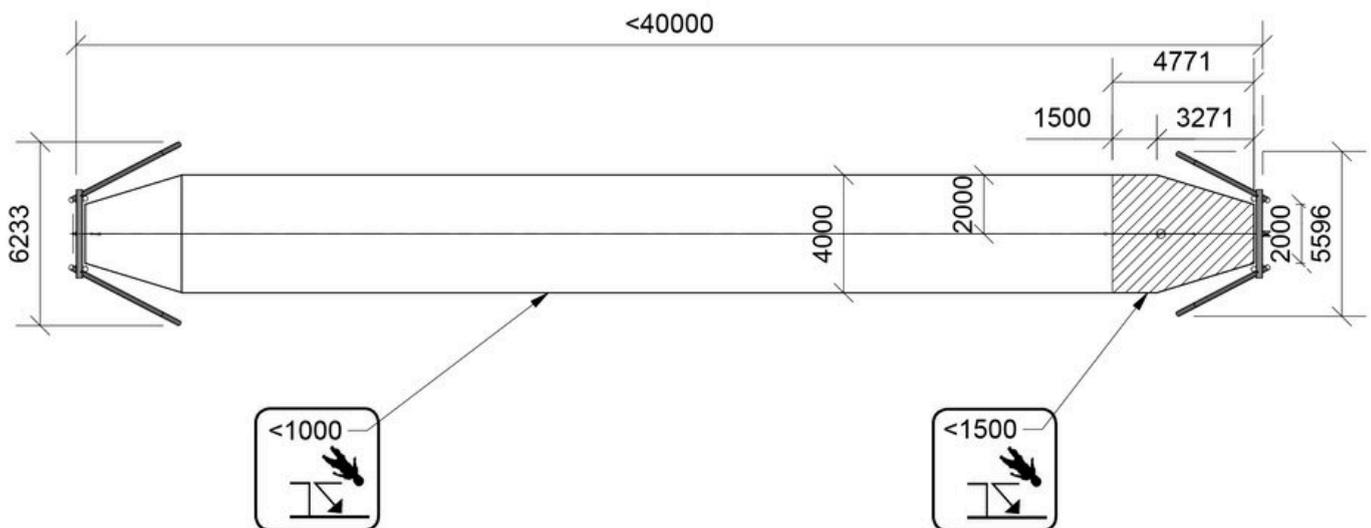

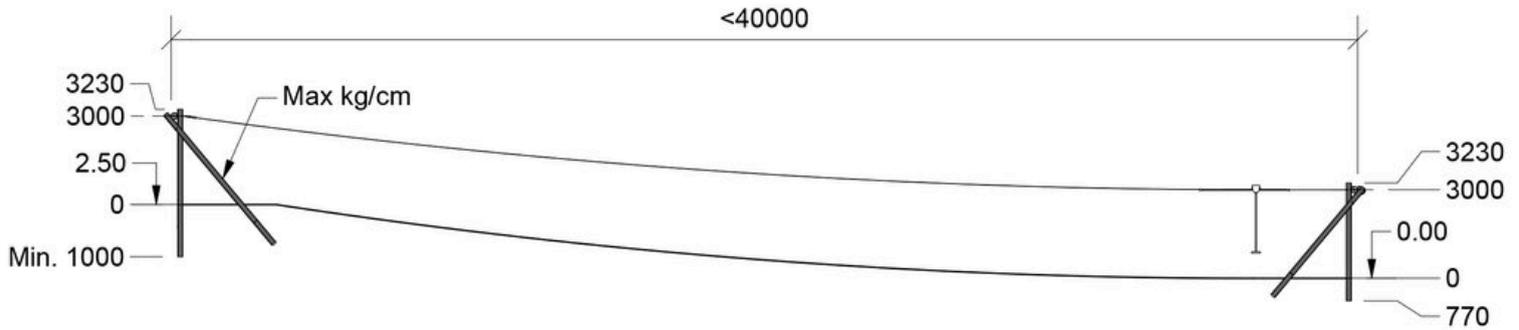

The Zipline promotes the development of spatial awareness, balance, and an understanding of speed and gravity. It also encourages social interaction, as children take turns and wait for their ride, fostering cooperation and patience.
