Product description

The Gallows with Climbing Nets offers children a challenging and fun experience, where balance and coordination are tested.

Two nets stretch from the ground to the central beam, providing a varied climbing journey. As children navigate through the nets, they train both motor skills and distance judgement. The top beam adds an extra dimension, as children need to manage both net and beam during their climb. The equipment's different textures and materials sharpen their senses.

Multiple children can play simultaneously, promoting social interactions, especially when they meet at the beam and need to decide which way to go.
