fixing

ReBnew
material

20 years
warranty

Low
maintenance

Regulations and certifications:

ECOSENS designer Litter Bin, total dimensions (width x depth x height) 450x350x960 mm, made with steel feet (treated with the Ferrus process, the triple-layer protector for iron, which guarantees optimal corrosion resistance) and ReBnew plastic profiles (BENITO's recycled polymer that is produced entirely from yellow container packaging and requires no maintenance). It does not crack, splinter, rot or dry out, resistant to humidity and inclement weather. With 2 openings, 1 for recycling and an ashtray. Prepared for anchoring with 4 expansion bolts according to surface and project. Optional items not included: Customizable marking with 74x35 mm/80x100 mm aluminum plate.

Materials & Finishes:

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

ReBnew: 100% recycled polymer, sturdy and durable, derived from urban, industrial, and domestic waste... It is weather-resistant, resistant to oils, acids, and seawater. It does not splinter or crack, nor does it rot or dry out.

Irregular surface finish makes the board extremely durable as it effectively hides scratches caused by vandalism. Nevertheless, surface scratches can be repaired to restore it to a like-new condition.

Scratch Repair on ReBnew

AWARDED WITH "DER BLAUE ENGEL": Product with low environmental impact throughout its lifecycle. It is awarded to products that meet criteria for reducing environmental impact in manufacturing, recycling, packaging, use, emissions, collection, and disposal. In addition to environmental criteria, it includes quality, safety, energy consumption, and other considerations. It is one of the most prestigious labels globally.
