

Uranium is a 2,250 mm tall, exciting climbing frame with a large number of different usage options. The climbing towers can be accessed by either a straight or a twisty climbing net, a climbing wall, a ladder or a rope ladder. There are rings and a trapeze bar for hanging and swinging, as well as a monkey bar section for access between the towers. Uranium can fit several children at one time, which makes for social play. Older kids love to spend time on the top beam. The frame is made of a hot-dip galvanised steel tube measuring 60 mm in diameter.

User age	3+
Number of users	20
Product length, mm	6200
Product width, mm	2240
Product height, mm	2320
Impact area, m ²	56.7
Falling space, m ²	56.7
Height required, mm	3750
Max. free fall height, mm	2250
Safety info	EN 1176-1 TÜV
Installation time (for 1), H	40
Foundation options	Deep mounting Surface mounting
Colour of walls and HPL
