

# PIKO-PIKO SPRING ROCKER

Piko-Piko Spring Rocker brings joyful motion and core development to the earliest stages of outdoor play for children aged 1+. Its supportive grips and stable footrests help children feel confident as they rock, encouraging balance, strength and rhythmic movement through independent or shared play. Designed for toddlers and young children, Piko-Piko is a welcoming piece that supports sensory integration and physical development in kindergartens, parks and early learning environments. Its compact size makes it easy to include in smaller playground layouts without compromising on fun. Made from durable HPL panels and a strong steel spring, Piko-Piko is built for daily use in inclusive playgrounds where safety, creativity and movement come together. Fall height for the rocker is 600 mm.

User age	1+
