

F24032M
SEESAW

Karin Seesaw brings gentle movement and rhythm to early play with fall height of 590 mm. With its soft-moving, compact design, it supports balance, coordination and social interaction as young children (aged 1+) rock together in a shared experience. Ideal for kindergartens and early childhood environments, Karin promotes physical confidence and connection in a space that feels safe and approachable. The seesaw's low height and steady motion make it welcoming for first-time users and inclusive for children of varying abilities. Built from PEFC-certified wood and a sturdy steel frame, Karin combines sustainability and durability in one compact piece.
