Maximilian Play Tower turns any playground into a vertical adventure packed with movement and imagination. Featuring four interconnected towers, this large-scale unit offers climbing, sliding and exploration across multiple entry points and activity elements. Children aged 4+ can engage in collaborative or independent play while building strength, agility and problem-solving skills with fall height of 2400 mm. The design encourages varied physical challenges that support full-body development and creative exploration. Made from PEFC-certified Nordic pine and HPL panels, Maximilian is built to withstand heavy daily use in public parks, schoolyards and urban play areas. It's a bold, inclusive centrepiece for playgrounds designed to bring children of all abilities together in active, joyful play.

User age	4+
