PEPPI SWING FRAME LOW

Peppi Swing Frame delivers a classic swinging experience in a compact format. With space for one swing seat, it's designed for smaller playgrounds or urban spaces where children (aged 1+) can enjoy rhythmic motion in a safe and welcoming way. The low design with fall height of 1200 mm, encourages confidence, balance, and core strength development in younger users while supporting sensory integration and gentle coordination. Constructed from pine wood and steel for long-term use, it represents the inclusive, approachable character of Nordic-design playgrounds, making movement and discovery possible even in tight spaces..

User age	1+
Number of users	1
