

ERNA BALANCING TRACK

Erna Balancing Track introduces a rhythmic path that invites young children (2+) to move, balance and explore. Its varied elements are designed to engage core muscles, support motor control and build coordination through active play. Erna is made from Nordic pine that is PEFC-certified. It has a strong HPL surface. This design also ensures a safe and slip-resistant experience in all seasons. The fall height of 570 mm offers a sense of challenge while maintaining security for early learners, gaining confidence. Designed to support inclusive playground environments, Erna encourages movement for children of all abilities. Its flowing design adds energy and structure to outdoor areas in parks, schoolyards, and early education settings.

User age	2+
Number of users	5
Product length, mm	3550
Product width, mm	1150
Product height, mm	560
Falling space, m ²	21
Height required, mm	2570
Max. free fall height, mm	560
