LOVIS BALANCE NET

Lovis brings playful challenge and balance into every step. This low-level vertical net with fall height of 1000 mm encourages children (2+) to wobble, shift, and balance as they cross. It helps them build coordination, core strength, and body awareness through movement. The structure has a strong steel-reinforced net for safety and durability. The frame is made of PEFC-certified Nordic pine. HPL plates provide reliable outdoor performance in all weather conditions. A flag-topped post adds a joyful visual landmark and enhances accessibility, especially for children with visual impairments. Ideal for parks, schoolyards and other outdoor activity spaces, it adds a distinctive, interactive feature to playground equipment solutions.
