

HEMMO PLAY PATH

Inspired by Nordic design principles, the Hemmo Play Path is a piece of playground equipment designed for toddlers and young children aged 2+ to explore movement, balance, and imagination. The gently sloping mounds support balance, coordination and motor development at ground level, encouraging imaginative play on foot or by balance bike. With a low fall height of just 260 mm, Hemmo suits playgrounds for all abilities. Made from PEFC-certified Nordic pine with a skid-resistant surface, it promotes safe and accessible play in parks, early education centres, and public spaces, looking for sustainable playground equipment with lasting value. Part of our modular playground equipment offering, Hemmo is easy to customise and integrate into playground designs. It brings joyful movement and timeless Nordic design to any outdoor space focused on wellbeing.
